TITRE	Anaérobie
DESCRIPTION	Viscosité moyenne, haute résistance
NOM	LOCTITE 680
CONDITIONNEMENT	LOCTITE 680
APPROBATION*	IT 250 ml

Description
LOCTITE 680 is a green, high strength, methacrylate ester acrylic liquid designed for the bonding of cylindrical fitting parts, particularly where low viscosity is required. The product prevents loosening and leakage from shock and vibration. It provides robust curing performance. It works on active metals (e.g. mild steel) and on passive substrates (e.g. stainless steel and plated surfaces).

Avantages
Low viscosity
Provides robust curing performance
Cures when cured in the absence of air between close fitting parts (oil seal)
Offers high temperature performance and oil tolerance
Resistant to surface contamination from various oils
Complies with ISO 9001 Standard for use in commercial and industrial potable water systems not exceeding +19.0 °F (+-32 °C)

Caractéristiques
High strength, methacrylate ester acrylic liquid designed for the bonding of cylindrical fitting parts, particularly where low viscosity is required.
